LABOR ORDERING INSTRUCTIONS

Step 1 Review Jurisdiction Information Below

The work outlined under Electrical Jurisdiction below must be performed by Edlen Electricians and cannot be performed by any other union or I&D House. Determine the type of work required in your booth space and complete the corresponding labor forms. The Power Delivery section indicates if power typically comes from the ceiling or the floor which may impact your booth layout.

Step 2 Complete the Appropriate Form

There is a different form utilized to schedule labor in your booth space. This allows exhibitors to pre-pay the estimated labor cost. This is only an estimate. Final labor and/or lift cost may be greater or less depending on time required and minimum labor charges.

A. Electrical Distribution

This form is used for the distribution of power on the floor in your booth space. This form should be completed for all island booths. Inline and peninsula booths need to provide this information only if power is required at any other location than the rear of the booth space.

Step 3 Return the following forms to Edlen

Electrical Order, Method of Payment, applicable Labor Forms and Electrical Layout.

ELECTRICAL JURISDICTION

WORK REQUIRING EDLEN ELECTRICIANS

1. Delivery of main power line to Island Booths only
2. Electrical distribution under carpet or overhead
3. Connection of all high voltage services
4. Hardwiring of any electrical apparatus
5. Installation of lighting hung from ceiling
6. Assembly & installation of lighting hung from truss
7. Motor, truss, rigging installation and cabling

POWER DELIVERY

Power is typically delivered from the floor in this facility and is brought to one main distribution point. From this point it is distributed to all other locations in the booth space. Depending on the total power requirements an electrical panel may be placed at the main distribution point. Electrical panels utilize a minimum of 1'x1'6" floor space. Please call if you have any concerns.

ELECTRICAL DISTRIBUTION UNDER CARPET

ALL Island booths MUST provide the information below. Inline and peninsula booths need to provide this information ONLY if power is required at any location other than the rear of the booth space. This information allows Edlen the opportunity to expedite move-in by having your power distribution complete prior to your scheduled move-in time. Complete all of the fields below including the "Labor Estimate" Section. Edlen will make every attempt to complete the work prior to your arrival, but it can not be guaranteed.

1. Provide an Electrical Layout Form:
 - A. The electrical layout must indicate each power outlet and its location with exact measurements.
 - B. The electrical layout must reflect booth orientation. Use surrounding booth or aisle numbers.
 - C. Identify a main distribution point. Power is delivered to that point and then distributed to other locations. Inline or peninsula booths do not need to provide a main distribution point. Power will be located at the rear of the booth.
 - D. If power is only required in one location in Island booths, indicate that location with measurements on your electrical layout.
2. What date will you begin building your booth?
 - A. Date: _____ Time: _____
3. Will you be utilizing any specialty floor covering other than carpet, such as vinyl or wood?
 - A. Describe flooring: _____
 - B. Estimated date and time flooring installation will begin. Date: _____ Time: _____
4. Show site supervisor:

Name _____ Cell # _____

Email _____ Company _____
5. The exhibitor acknowledges there is a minimum 1 hour labor charge for the distribution of services and 1/2 hour for the removal of services. Island booths that only require power delivered to one location incur a 1 hour installation and removal charge.
6. In the event a lift is required to deliver power from the ceiling, or if the exhibitor requests power be delivered from above when it's available on the floor, lift charges will apply for installation and removal. There is a minimum 1 hour installation and 1 hour removal cost for both lift and labor. For safety reasons lifts require a 2 man crew.
